

XMRE3 Range Extender

ISO XC4 cards recommended

XMRE3 Range Extender

The XMRE3 Range Extender is an antenna adapter developed to extend the read range of the XM3 *MICROPROXS*[™].

Easy installation; a DC power supply is required only. XM3/XMRE3 range extenders are air sync if further away than 1 metre. All XM3 versions can be used with the XMRE3. XC4 ISO cards are recommended in conjunction with the XMRE3.

Read ranges:

XC4 up to 450 mm
XC5T not recommended
XK2 up to 300 mm

Article Number

1104-0008-0000-000
