

XRP3K Keypad/Programmer

Wireless PIN Keypad
No cables needed

RF communication between XRP3K and XM3

PIN Keypad mounting
"firm click" connection

XRP3K RFID Keypad/Programmer

The XRP3K can be used in conjunction with the XM3 as an additional PIN keypad without having to connect any cables. With the XRP3K 2.700 PIN codes can be added into the internal memory of the XM3. In PIN keypad mode, it can also be used to program the XM3 in combination with the program master card. The XRP3K can be secured against tampering when used together with the XM3. It can be activated e.g. after working hours or during weekends only.

XM3 stand-alone default setting for:

- 1.000 Users
 - 1.000 PIN codes
 - 1.000 Names
 - 500 events
- (15 different XM3 configuration files can be selected, see master manual)

Article Number
1103-0503-0000
